OBJECTIVE

Provide Experties of web development knowlegde to provide best possible solution.

Summary

Hey there, I am a 23 yearsoldsenior software engineer from Lahore (Pakistan) building web applications using different lates technology for approx. 2 and a half years now. Programming is more than a job for me it's a total passion. I am very passionate about technology, since I believe it is a strong agent of social and economic change, nothing makes me happier than making a change in society, no matter how small. I love everything that has to do with technology.

I have total approximately 2 and a half years of experience as Web Developer with technologies like JavaScript like (Vanilla JavaScript , JQuery , Ajax , ES5 , ES6 , React JS , Vue JS , Node JS (Express JS) and PHP (Laravel, Yii2 , CodeIgniter) and cloud technologies like AWS (AWS Lambda , Dynamo DB , API Gateways , SNS , Cognito User Pool) and many more...

Why don't we work together? Thank You!

Important Note

I would highly recommend Please must visit my Site and Resume Site to see my projects and experience for more insight look.
